

The FCC should not recommend any changes that would lessen Indiana's Telephone Privacy law protections. My time at home is very important to me and our family. Unnecessary phone calls interrupt our children's homework, our family meals, and family time together. I signed up to eliminate unnecessary calls so that we would not receive the 4-5 calls per night. The privacy law has been wonderful for us. We are now only receiving maybe 1-2 solicitation calls per week. Please do not change this law and affect our family time. It is very important!
